INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/007132

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-9	YES
	Claims		NO
Inventive step (IS)	Claims	1-9	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-9	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

1. The closest prior art is the push-fit connector known from EP-A-1 178 255. Said document is acknowledged in the description and discloses the features set out in the preamble of claim 1; the subject matter of said claim, the only independent claim, is therefore novel (PCT Article 33(2)).

The characterising features solve the technical problem of developing a push-fit connector of this type such that, with minimal complexity of manufacture and assembly, a high degree of operational reliability is achieved in connecting and securing the pipe ends in the push-fit connector.

The claimed solution is not known from the prior art, nor is it rendered obvious thereby. In particular, neither document EP-A-1 178 255 nor document US-A-2003-0067170 show a front and a rear sleeve part as per claim 1 since, in these known quick-fit connectors, one sleeve part is arranged radially within the other, that is to say it is axially overlapping.

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

The subject matter of independent claim 1
therefore satisfies the requirements of PCT
Article 33(3).

2. Claims 2-9 are dependent on claim 1 and, thus,
also satisfy the requirements of the PCT in
respect of novelty and inventive step.
3. The invention as described is industrially
applicable in accordance with PCT Article 33(4).
